INTRODUCTORY.

We take pleasure in presenting herewith, the Cambridge City Directory for 1889, in the regular series, No. 38. We have endeavored, as heretofore, to execute our work, in its various departments, in a manner that shall commend it to our patrons and the general public. Every facility suggested by long and varied experience in the business has been made use of, and neither pains or expense has been spared. We shall be glad to receive, from whatever source, any suggestions which may make our annual Directory, more complete, more accurate, or more useful. May we not, on our part, expect a pecuniary support that shall do credit to the characteristic public spirit and enterprise of Cambridge?

As usual, a full Directory of Harvard University may be found on page 617.

We extend our thanks to all who have aided in the prosecution of the present issue.

The following synopsis is appended: —

INSTRUCTION TO KEY-HOLDERS.

Alarms are to be given from the box nearest the location of the fire.

To give an alarm, open the door, pull the hook to the bottom of the slot once, and let go.

Each box contains a small bell, which, if heard before you pull, indicates that the alarm has been previously given. Any person listening at a box will learn the number of the box from which the alarm was given but in no case will you pull the hook while the alarm is striking After giving the alarm, remain at the box so as to direct the firemen to the fire. Be sure that you lock the box before leaving it. For instance, if an alarm proceeds from box 36, the bells and gongs attached will strike three; then, after a short pause, six consecutive blows, thus; III-IIIIII.

Do not give an alarm for a fire seen at a distance, unless assistance is called for.

SIGNAL FOR NO SESSION OF THE GRAMMAR AND PRIMARY SCHOOLS ON DAYS OF SEVERE STORMS.

The signal is five strokes of the fire alarm repeated once.

When given at 7.55 A. M., the morning session of the grammar and primary schools will be omitted.

When given at 11.45 the morning session of the grammar schools will be prolonged one hour, and the afternoon session of the grammar and primary schools will be omitted.

When given at 12.45 the afternoon session of the grammar and primary schools will be omitted.

Citizens are earnestly requested to inform themselves where keys to the signal boxes are kept, signs suitably inscribed being placed over each box, giving the requisite information.

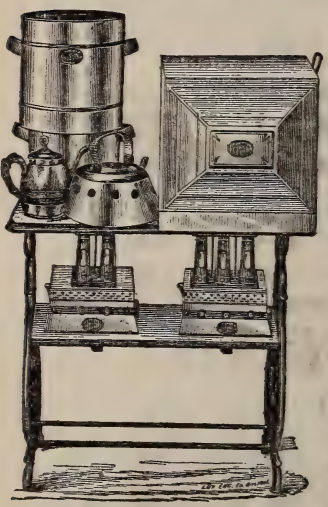
WEST ODORLESS OIL STOVE.



There is an immense saving of fuel by using the WEST PATENT OIL STOVE. They are provided with two separate tanks, one for oil and the other for water, and the proportion of water to oil is as one to three, The oil is carried to the wick in the usual way. On each side of the oil wick tube is another tube connected with the water tank, in which is placed a packing of asbestos, which seldom requires trimming or changing. The result is as follows: When the oil wick is lighted the water is drawn up by capillary attraction and instantly converted into steam, the oxygen and hydrogen in the water are at once decomposed and unite with the hydo-carbon vapor, which is always in excess when kerosene oil is burned: they at once add to the material combustion, and the result is a most intense heat, free from smoke, and absolutely without odor.

These stoves are perfectly safe, are supplied with a complete set of cooking utensels, and are in every way, shape, and manner, the most practical Oil Stoves in existance.

We Claim the following Advantages:

1—Absolute safety, the oil is always cool. 2—Durability, being made of copper and nickel. 3—An even flame, can be used for hours without attention. 4—Positively no odor or smoke. 5—Economy, they burn one-third less oil by using the water.

Manufactured and for Sale by WM. B. BERRY & Co., 79 North St., Boston, Mass.

This Stove received a BRONZE MEDAL and DIPLOMA at Mechanics Fair, November, 1887.
